

Modern primary: corrected origin coding and Cape−born contrast at the mean covariate profile (T6); unconditional cohort difference (H3).
Bars: Bonferroni intervals (1 − 0.05/9); CR1 by court volume, t(42) for T6; wild cluster restricted bootstrap by volume for H3 (reported only).
Grey: sensitivities (reported; never verdict−setting). Shading: credible−null band. Dashed: confirm threshold (half the printed magnitude).
