
Modern primary: corrected coding (grazier = Farmer, century removed), sons born 1800−1909, father−clustered inference; bars are Bonferroni CIs (1 − 0.05/6).
Original code: do−file output; logit bars are conventional 95% CIs; the original code reports odds ratios under the RR label; no code survives for I4.
Shading: credible−null band (I1−I3), equivalence band +/−5 pp (I4). Dashed: confirm threshold.
