
Surviving data vintage (S3 sample), not the published sample. A (blue): unweighted cohort mean differences, simultaneous 95% sup−t intervals (Family D).
B: truncated−normal ML, c = 159.385 cm, force FE and age 21/22 dummies, sandwich SE; simultaneous 95% intervals (Family T, rank−4 c_T).
Grey: sensitivities (reported; never deciding), each with its own simultaneous interval. Gold: published Table 3 col 1 (a different estimand).
